This diagram illustrates the fifth step of the assembly. The main view shows a completed base structure on a green 16x32 Technic plate. The base consists of a grey 1x10 Technic beam with various black and red components attached. A yellow hand piece is being attached to the front of the base. Two inset diagrams provide detailed views of the attachment process. The top inset shows a yellow hand piece being inserted into a black 1x2 Technic beam. The bottom inset shows a black 1x2 Technic beam being inserted into a black 1x2 Technic beam, which is part of the base structure.
